

INTRODUCTION TO RESTORATIVE

- Ability to chart **existing restorative procedures** and treatment planning (coming soon). All procedures will be added as existing restorations by default
- All common restorative procedures are supported (e.g. fillings, crowns, root canals, and implants. See page 2 for all currently supported procedures and ADA codes)
- Use the following command structure to chart procedures:

"Add <procedure> on tooth <#>"

(OR)

"Add <procedure> on tooth <#> <surface>"

PROCEDURES SUPPORTED

- **Fillings (Amalgam and Composite/Resin)** - say "Add an amalgam filling on tooth 15 MOD"
- **Root Canal** - say "Add root canal on tooth 13"
- **Crowns (Zirconia, PFM and Porcelain)** - say "Add <type of crown> on tooth 10" (defaults to PFM)
- **Implant** - say "Add an implant on tooth 5"
- **Extraction** - say "Add an extraction on tooth 1"
- **Abutments** and **Veneers** are also supported

IMPORTANT: Marking missing teeth requires a different command structure:

"Add missing teeth on tooth number <#>, <#>, <#>"

(OR)

"Add missing teeth on 1, 16, 17, 32"
